Computer Science student building across machine learning, full stack development, and AI automation. Currently interning at the CUNY Building Performance Lab, applying AI to building energy consumption and research.

EDUCATION

Brooklyn College (CUNY), B.S. Computer Science

Expected Fall 2027

NYC College of Technology (City Tech, CUNY), A.S. Computer Science

Completed

EXPERIENCE

CUNY Building Performance Lab, Machine Learning and AI Intern

Jun to Aug 2026

- Build Python machine learning models on high resolution building energy data using PostgreSQL on Ubuntu.
- Model energy use before and after retrofits with weather normalized regression to quantify measured savings.

Village Core / InterGen, Software Developer and Technical Lead (Volunteer)

Mar 2026 to Present

- Built and launched a full stack SME tracker (Streamlit, Supabase, Docker), now a sellable product for other organizations.
- Own backend, REST API integrations, multi provider AI (Gemini, OpenAI, Anthropic), deployment, releases, and AI compliance.

Octopilot, Software Engineering Intern

Apr 2026 to Present

- Shipped updates to a live startup product; learned Flutter and Docker for cross platform build and deployment.

Women Entrepreneurs of Baltimore (WEoB), Social Media and Marketing

May 2026 to Present

- Run social media and marketing campaigns, integrating modern AI tools into content and audience growth.

Digital Girl, Inc. / Girls Who Code, Instructor and Intern

Jan to May 2024

- Taught programming and led coding and robotics labs; helped design lesson plans for student groups.

Young Men Strong / Thoughts Magazine, Social Media and Marketing Intern

Apr to Jun 2023

- Managed the content calendar and produced visual assets in Canva for a consistent brand voice.

HACKATHONS

- Google Hackathon: built a full stack subway navigation assistant using live NYC transit APIs and Google libraries to feed real time data.
- Handshake ChatGPT Hackathon: prototyped a web app integrating Clerk, Stripe, Google Gemini, and Supabase under time constraints.
- Village Core AI Hackathon: implemented custom Gemini Gem systems tailored to help elderly users day to day and assist caretakers.

CLUBS AND ACTIVITIES

- Google Developer Group (GDG), Member.
- AI Automation Club, Industrial Engineering Club, Mechanical Engineering Club, Member. (City Tech)

PROJECTS

- Cybersecurity Home Lab: virtualized network (Ubuntu, Kali, Windows) with pfSense, Suricata IDS, and a Splunk logging pipeline.

SKILLS

Programming: Python, SQL, C++, Dart (Flutter), HTML, CSS, JavaScript

Data and ML: pandas, PostgreSQL, regression modeling, model evaluation, multi provider AI (Gemini, OpenAI, Anthropic)

Web, App, DevOps: Streamlit, Flutter, REST APIs, Docker, Supabase, Git, Linux (Arch, Ubuntu), deployment and releases

Other and Languages: Splunk, Wireshark, Nmap; English and Spanish (fluent)

CERTIFICATIONS

- Google Cybersecurity Certificate. Google DeepMind, AI Research Foundations.
